The Global Multistakeholder Meeting on the Future of Internet Governance

23, 24 - April 2014
São Paulo, Transamérica Hotel

Background

- Dilma Rousseff, Brazil President's Speech at UN GA (2013.9.24)

    " Brazil will present proposals for the establishment of a civilian multilateral framework for the governance and use of the Internet and to ensure the effective protection of data that travels through the web."
Background

- Montevideo Statement on the Future of Internet Cooperation (2013.10.7)

  - They reinforced the importance of globally coherent Internet operations, and warned against Internet fragmentation at a national level. They expressed strong concern over the undermining of the trust and confidence of Internet users globally due to recent revelations of pervasive monitoring and surveillance.

  - They identified the need for ongoing effort to address Internet Governance challenges, and agreed to catalyze community-wide efforts towards the evolution of global multistakeholder Internet cooperation.

  - They called for accelerating the globalization of ICANN and IANA functions, towards an environment in which all stakeholders, including all governments, participate on an equal footing.

  - They also called for the transition to IPv6 to remain a top priority globally. In particular Internet content providers must serve content with both IPv4 and IPv6 services, in order to be fully reachable on the global Internet.
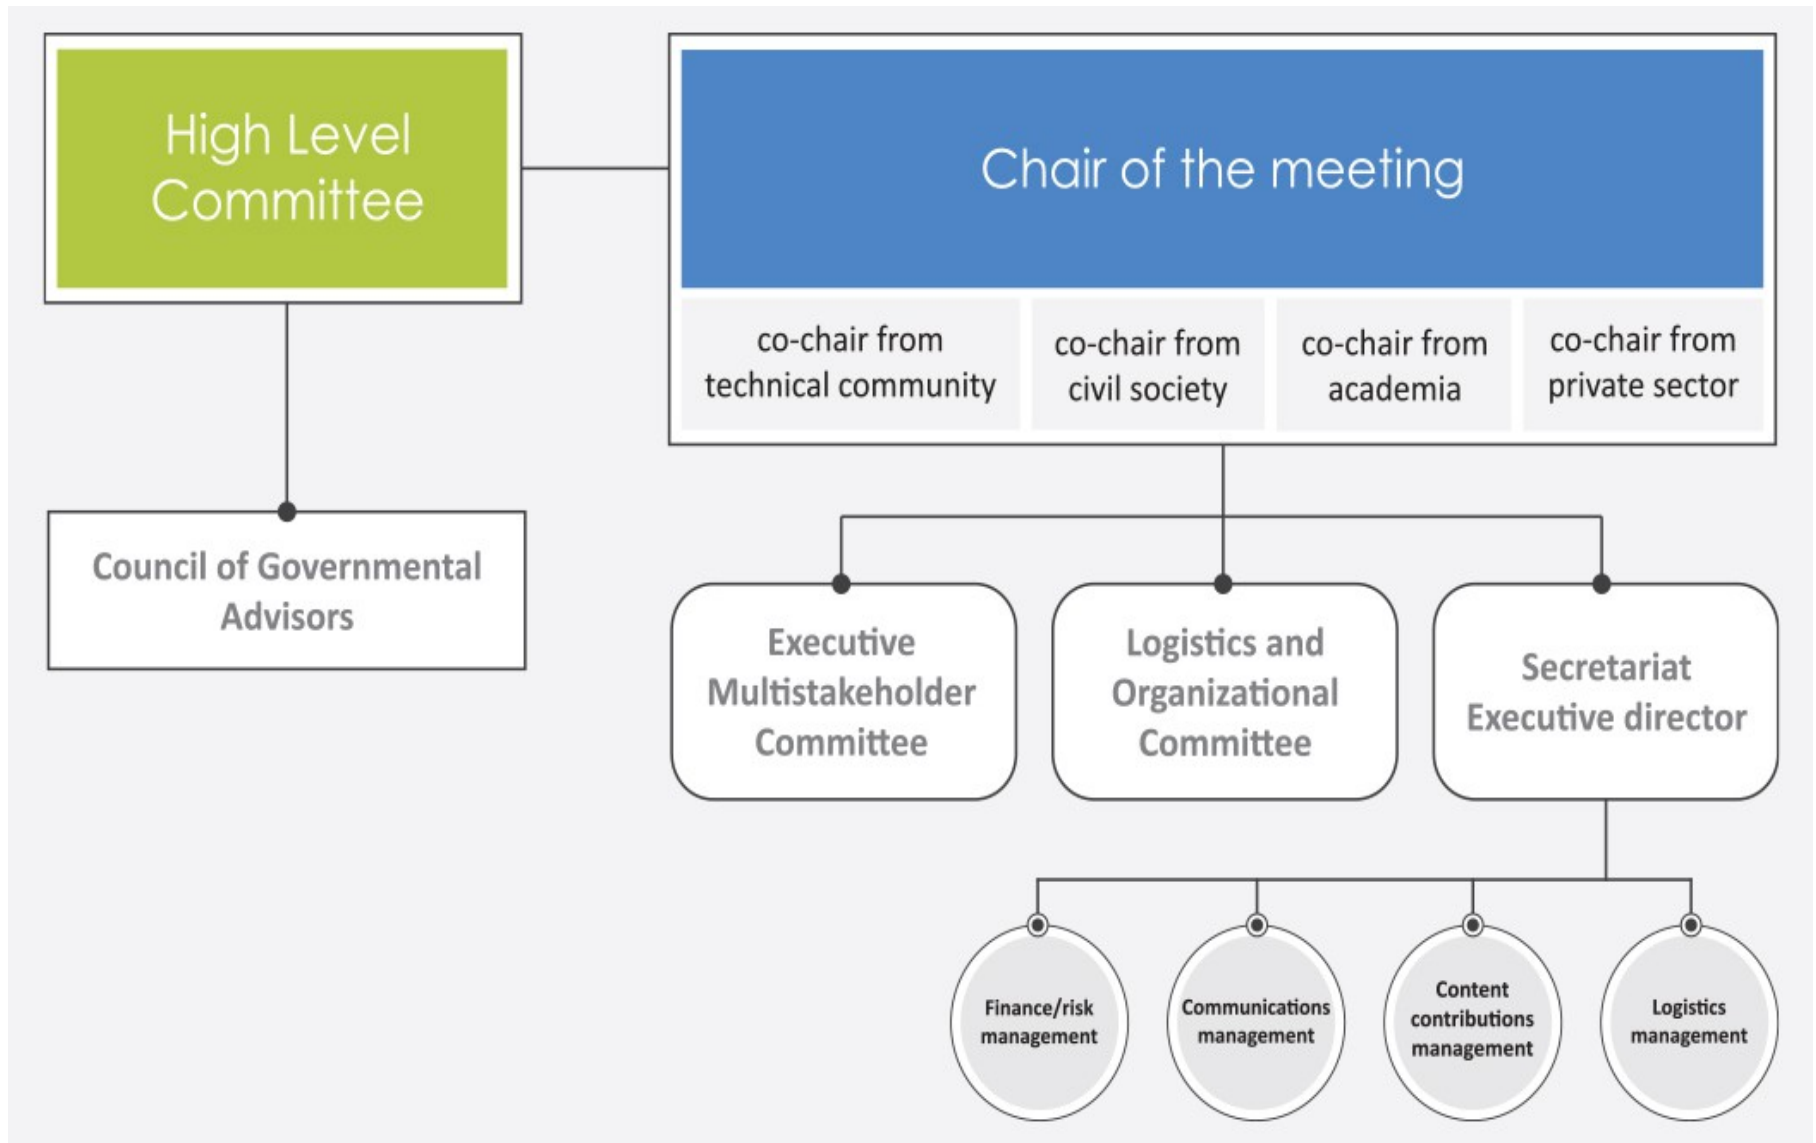

Background

- **ICANN CEO**, 브라질 대통령에 인터넷 거버넌스 국제회의 제안 (2013.10.9)

- **The Global Multistakeholder Meeting on the Future of Internet Governance**
